

LOOP-PRO Tuner Primer (Virtual)

Training Agenda

One Day (4 Hours)

HEAR - SEE - DO

Our workshop methodology is designed to fully engage participants in the examination of real-world process control challenges. By reinforcing traditional lectures with demonstrations and workshop exercises, we empower you to apply innovative techniques immediately and with confidence.

Instructor Led Training

This workshop explains how to install, configure, and use LOOP-PRO TUNER. Participants learn essential aspects of the software for the purpose of applying it in the modeling and tuning of PID controllers.

Software Fundamentals

- Overview of LOOP-PRO TUNER package
- Basic Installation, Configuration And Use

Basics of PID Primer (Theory-based)

- 6 Steps Of Tuning PID Controllers

Interactive Workshops

- Flow Control
- Heat Exchanger
- Cascade Loop
- Level Control

OPC Connections

- Discussion/Demo For Connecting To Various OPC Servers (Examples For Class – Rockwell Automation, DeltaV, Yokogawa)

Questions and Answers

Who Should Attend?

Current and prospective licensees of Control Station's LOOP-PRO TUNER.

What's the Objective?

Learn how to easily install and configure LOOP-PRO TUNER as well as how to successfully model and tune common industrial processes using the software's features.

How's it Delivered?

Review and demos of essential capabilities are followed by hands-on exercises.
